1. The substitute specification filed on 5/8/03 has not been entered because it does not conform to 37 CFR 1.125(b) because: the statement as to lack of new matter under 37 CFR 1.125(b) is missing.

The amendment to the claims filed on 5/8/03 does not comply with the requirements of 37 CFR 1.121(c) because 4 new claims were added and no claims cancelled, and the amendment did not conform to 37 CFR 1.121(c) of the Manual of Patent Examining Procedure. Amendments to the claims filed after March 1, 2001 must comply with 37 CFR 1.121(c) which states:

(c) Claims.

(1) Amendment by rewriting, directions to cancel or add: Amendments to a claim must be made by rewriting such claim with all changes (e.g., additions, deletions, modifications) included. The rewriting of a claim (with the same number) will be construed as directing the cancellation of the previous version of that claim. A claim may also be canceled by an instruction.

(i) A rewritten or newly added claim must be in clean form, that is, without markings to indicate the changes that have been made. A parenthetical expression should follow the claim number indicating the status of the claim as amended or newly added (e.g., "amended," "twice amended," or "new").

(ii) If a claim is amended by rewriting such claim with the same number, the amendment must be accompanied by another version of the rewritten claim, on one or more pages separate from the amendment, marked up to show all the changes relative to the previous version of that claim. A parenthetical expression should follow the claim number indicating the status of the claim, e.g., "amended," "twice amended," etc. The parenthetical expression "amended," "twice amended," etc. should be the same for both the clean version of the claim under paragraph (c)(1)(i) of this section and the marked up version under this paragraph. The changes may be shown by brackets (for deleted matter) or underlining (for added matter), or by any equivalent marking system. A marked up version does not have to be supplied for an added claim or a canceled claim as it is sufficient to state that a particular claim has been added, or canceled.

(2) A claim canceled by amendment (deleted in its entirety) may be reinstated only by a subsequent amendment presenting the claim as a new claim with a new claim number.

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

3. For the Applicant's information and benefit for future filings, the examiner performed an unofficial review of the new claims, which were not entered. The claims are incomplete in that they do not comprise either a set of elements, which operate together to perform a function, or they do not provide a set of process steps enabling a function to be performed. The preamble to claim 1 recites a number of capabilities of the "technology element," but the body of the claim does not support any of these capabilities. The body of the claim merely states that the user provides an input for preferences, and somehow the tool meets all the objectives. It would be analogous to stating that a user prepares a wish list, or a written list of requirements, and submits it to a machine, and then the machine performs all of the necessary functions to meet the user's requirements. The claims must demonstrate how the elements operate together to perform the function. The claims are incomplete for omitting essential elements or

structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.
